

MODEL APPLICATION

How to apply to become a student representative in administration

Sally Student

Degree Programme of Exemplary Sciences, Faculty of Student Studies

Hi! I am Sally Student, and I am interested in applying to become a student representative in administration in the University Collegium. I am a second-year student of exemplary sciences, and I am interested in developing the University community. I am available for the position of student representative for the entire 2026–2027 term, and I am very motivated to amplify the voice of the Faculty of Student Studies in the collegium together with others.

As a student representative on the University Collegium, I would like to have an impact on communality and high-quality teaching at the University. I am aware of the kind of feedback students have given on the operation of our degree programme and faculty because we have discussed it in my subject organisation's meetings. Especially research conducted at the University should be used more in teaching, and study flexibility in general should be increased to help students cope better.

I have served as the person in charge of study affairs in my subject organisation this year and also cooperated with the faculty organisation. I am highly motivated to stay in touch with my subject and faculty organisations and to listen to students' views when preparing for the University Collegium's meetings.

I am a good debater, and I am able to take different perspectives into account and clearly argue for my views. I have been able to develop my cooperation skills through my role as the person in charge of study affairs in my subject organisation, meeting members of other subject organisations and reconciling our views before meetings with staff. I have previously acted as a coach in one of my hobbies, which has helped me improve my skills in listening to others.

Degree
programme &
faculty

Motivation and
commitment to
the position

Understanding of
current affairs at
the faculty and
the University

Possible previous
experience and
contacts with
subject or faculty
organisations

Cooperation skills
and the ability to
become organised
as a group with
the other student
representatives

I am used to learning about new subjects and have learned how to manage new information and bring up ideas for development through both my studies and my duties in my subject organisation. I am looking forward to getting to develop the University in full cooperation with other students and staff members.
